SALIM MWATSEFU

FULLSTACK WEB DEVELOPER

Nairobi, Kenya
Phone: 0753189589
Email: sjmwatsefu@gmail.com
Personal Website: https://salimmwatsefu.vercel.app/

OBJECTIVE

Results-oriented Full-Stack Web Developer with a strong commitment to crafting dynamic and user-friendly applications. Seeking a challenging position to leverage expertise in frontend and backend development for contributing to innovative projects. Dedicated to delivering high-quality code, collaborating effectively with cross-functional teams, and continuously expanding skillset in a fast-paced environment.

EDUCATION

MORINGA SCHOOL.
Certificate, Software Engineering.

UNITED STATES INTERNATIONAL UNIVERSITY – AFRICA.
Bachelor of Science in Applied Computer Technology.
GPA: 3.6

SKILLS

• **Frontend Web Development**: Proficient in React JS, Next JS, Typescript, JavaScript, CSS, Tailwind CSS, Bootstrap, and HTML.
• **Backend Web Development**: Experienced with Ruby On Rails, PostgreSQL, and SQLite3.

PROJECTS

1. **KUKU-HUB INVENTORY MANAGEMENT SYSTEM**

Description: Developed a comprehensive web application enabling users to manage business sales, track products, and generate sales reports with interactive graphs.

Tech Stack Used: Next JS, Typescript, Tailwind CSS, Ruby on Rails, and PostgreSQL.

Key features:

• Implemented a visually appealing dashboard with responsive charts for data visualization.
• Created functional tables allowing seamless data management through CRUD operations.
• Integrated authentication functionality.
• Ensured responsive design across multiple devices.

2. WESTWIRED ECOMMERCE PLATFORM

Description: Designed and built an ecommerce website facilitating the purchase of electronic items such as headphones, laptops, and mobile phones.

Tech Stack Used: Next JS, Tailwind CSS, Framer Motion, and Stripe.

Key features:

• Developed an intuitive user interface with captivating animations.
• Ensured cross-device compatibility for a seamless user experience.
• Integrated secure payment processing through Stripe.
• Implemented a fully functional cart for easy product selection and checkout.

3. CAREER CONNECT JOB PORTAL

Description: Contributed to the development of a web application connecting job seekers with employers through job postings and applications.

Tech Stack Used: React JS, Ruby on Rails, and PostgreSQL.

Key contributions:

• Collaborated across the development lifecycle to enhance the frontend codebase.
• Designed dynamic components and an engaging User Interface.
• Implemented user registration and job application features.
• Enabled employers to post job listings and find suitable talent.
